

Paul's Product Review

Reproduction Stickers For Your Fiero

by: Paul Vargyas – Member at Large

If you are looking for replacement stickers, RPO stickers, or special identification stickers, we have a new source that can provide everything you need! As you see in the picture, this "kit" of stickers includes:

- Two variations of the coolant fill procedure (varied by year and even production runs)
- Two fan warning variations (varied by year and even production runs)
- Emissions/vacuum line routing (year specific to your car)
- Tire pressure and vehicle weight (inside driver's door; year specific to your car)
- Jack and stowage instructions (year specific to your car)
- 2.8L V6 air filter canister sticker with filter replacement part number (for 2.8L Fieros only)
- Belt routing diagram (for 2.5L Fieros only)
- Door lock and unlock diagrams, as well as the red strips for the slide lock
- "Unleaded Fuel Only" sticker for inside the gas door

NIFE member, John Panicci, from Lake Worth Florida, has produced quality reproductions of these stickers. The best way to view these is to go directly to his website, www.fierostuff.com. There you will find links to stickers, samples, and even a video showing the quality. The cost for an entire set is only \$30.00 including shipping (to US). Installation instructions with surface cleaning pads are included.

Interestingly, John also produces reproduction RPO sheets (the ones that mount on the left, front inner fender). These show the codes for all the options on your car. John can reproduce these by merely typing in your RPO codes. If you have added factory options (i.e. power mirrors), you can just add the RPO code in the list and your "new" RPO code sticker will have that coded into the list. John conveniently includes a link to all Fiero RPO codes. Cost is \$12.00-\$17.00 depending on what material choice you make.
